

How to Put In Kathy's Tails

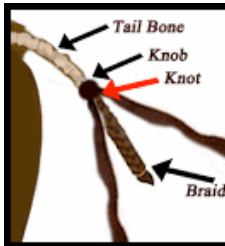

Step 1: Take the 8 inch braid at the end of the tail bone.

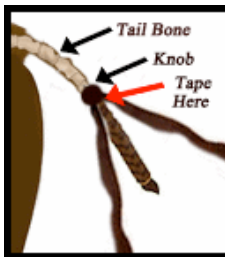

Step 2: Use the tool to pull the braid through the hole in the top of the tail addition.

Step 3: Slide the knob of the tail addition up against the tail bone.

Step 4: While holding the tail addition hair out of the way, tie 2 knots in the braid. Make sure the knob is against the tail bone and the knots are right at the bottom of the knob. This will hold the tail addition up against the tail bone.

Step 5: Tape around the knots with plastic electrical tape to hold the knots in place. Use a color of your choice.

Step 6: You can, if you desire, use the rest of the braid, and braid that to the hair in the tail addition for hair to hair rule.
