

### **Tail Extension Care**

- After each use, put your shampoo in a bucket with some water and wash the tail extension like an old pair of socks. After dipping the tail in the bucket rinse it with the hose and throw out the soapy water. Replace it with clean water and conditioner of choice. Repeat the same process with conditioner, then rinse and dry. Do not comb wet tail. Comb in sections when it is partially or completely dry. Only takes 5 minutes to keep you tail looking full and beautiful!
- It is recommended to store tail extension in a tail bag and remove the weights if not using for long period of time.
- Kathy Williams Tail Extensions are 100% horse hair to comply with breed association rules.
